Restoring America’s National Parks
WASHINGTN

WASHINGTON enjoys the economic, recreational, and cultural benefits of the National Park System, which includes 15 park units in the state.

National park sites in Washington are part of a system that encompasses 84 million acres across the country. Established by Congress in 1916, the National Park Service (NPS) manages and maintains more than 400 nationally significant sites in all 50 states and several territories. National parks are a mosaic of wild landscapes, historic and cultural sites, scenic byways, trails, military parks, and monuments that celebrate and commemorate remarkable people and America’s heritage.

Unfortunately, more than 100 years after its creation, NPS is struggling to maintain many of its facilities. The agency currently faces a deferred maintenance backlog that is estimated to be $11.9 billion based on FY2018 data.

Why is there Deferred Maintenance?

- Aging infrastructure: many park facilities and systems are 50-70 years old and need updating
- Record visitation—approximately 318 million visitors in 2018—causes wear and tear on resources
- Unreliable funding for deferred maintenance

What is Deferred Maintenance?

Deferred maintenance is work that is not completed at required intervals to ensure acceptable facility conditions. If work is delayed for more than a year, it is typically considered deferred. Examples of repairs include:

- Crumbling roads and bridges;
- Unsound buildings, including historic structures;
- Outdated wastewater and electrical systems;
- Neglected military sites; and
- Deteriorating monuments and memorials.

National Parks in Washington

In 2017, over 8 million visitors enjoyed national parks in Washington. From Fort Vancouver to Olympic National Park, Washington saw $507.8 million spent in gateway communities. That spending supported 6,538 jobs and added a cumulative benefit of $676.8 million to the state economy – money that helps businesses, schools, and families.

Despite the importance of national parks to Washington’s economy, they need more than $427 million in infrastructure repairs. To keep national parks in Washington strong and vibrant, and to capture the benefits they provide to the state, restoration must be a priority.

Why Address Deferred Maintenance?

- **Preservation:** We need to ensure care of our nation's historic and cultural resources.
- **Access:** Without working roads and trails, visitors can't enjoy all our park resources.
- **Revenue:** Local communities are dependent on park-generated tourism dollars.
- **Kids:** Maintaining our national parks is a responsibility Congress owes to future generations.
- **Safety:** Aging infrastructure and building code issues need to be addressed so visitors are provided a safe experience.
- **Cost Savings:** Repairing and updating park facilities can provide significant cost savings to tax payers.

Proven Economic Boosters

- Parks are a top travel destination in the U.S.
- There were an estimated 318 million visits to the national parks in 2018.
- In 2017, park visitors spent an estimated $18.2 billion in nearby communities and a collective $35.8 billion boost to the national economy. That spending supported 306,000 jobs.

From sites that are culturally important to Native American tribes or that honor those who served in our military, to parks that commemorate painful aspects of the Civil War, Japanese internment, or the Civil Rights movement, our National Park System documents our nation's diverse and evolving history.

Congress has a responsibility to ensure the NPS has the resources needed to maintain park infrastructure, so future generations can enjoy and learn from our national treasures.

Solutions

To address deferred maintenance at NPS sites across the country, Congress should:

- Ensure that infrastructure initiatives include provisions to address park maintenance;
- Provide dedicated annual federal funding for national park repairs;
- Enact innovative policy reforms to ensure that deferred maintenance does not escalate;
- Provide more highway funding for NPS maintenance needs; and
- Create more opportunities for public-private collaboration and donations to help restore park infrastructure.

You Can Help

Ask your federal representatives to support dedicated federal funding and an infrastructure proposal that addresses the deferred maintenance needs within the National Park System.

Contact your senators, Patty Murray and Maria Cantwell, at senate.gov. To contact your congressmember, visit house.gov and enter your zip code.
